SBK726	One inch black solvent fast drying CISS cartridge 350ml-SBK726	■	2.0	9.5	OFF

Instructions for Ink Cartridge Use:

1. During operation, ensure the large ink cartridge is either hung vertically or wall-mounted. Maintain the bottom of the large ink cartridge at approximately 19 centimeters above the lower edge of the print head.
2. For your first-time usage, close the valve on the continuous ink supply system by aligning it vertically with the ink tube. Use the ink cartridge maintenance tool to conduct a vacuum priming. Following this, open the valve to commence printing. If ink leakage occurs during operation, you can utilize this vacuum priming method and perform nozzle cleaning as needed.
